EXPERIENCE

Principal Designer | AntStack Technologies — Nov 2018 - Present

- Pioneered AI-Integrated Workflows: Introduced Generative AI tools into the design phase, reducing UI ideation time by 40% while maintaining brand consistency.
- Architected "Smart" Design Systems: Developed and maintained a scalable React-based design system in Figma, ensuring 100% component parity between design and code.
- Stakeholder Leadership: Collaborate with product managers to define AI-driven feature sets, from personalized onboarding to intelligent data visualization.
- Frontend Optimization: Oversee the development of user-facing features, ensuring maximum speed, scalability, and accessibility.

UI engineer | Wheels Box — Nov 2018 - Oct 2019

- Headed product design, branding, and frontend UI for a transportation logistics platform.
- Built responsive HTML/CSS/JS components to elevate overall customer experience.

HTML developer | Infibeam Avenues — Nov 2015 - Oct 2018

- Designed visually consistent, intuitive interfaces for consumer-facing and internal web platforms.
- Collaborated with engineering teams to significantly improve end-user usability.

Catalogue executive | Reliance Retail Ltd — Dec 2014 - Oct 2015

- Coded accurate e-commerce catalogue pages using HTML and CSS.
- Designed promotional banners and optimized visual assets using Photoshop.

Catalogue executive | HomeShop18 — July 2014 - Nov 2014

- Developed digital product listings and catalogue layouts with HTML/CSS.
- Produced marketing graphics to drive visual consistency across promotional campaigns.
